SOLID STEPS IN THE SKY

PAVELSIS

Biz Kimiz?

As **PAVELSİS**, we started our activities in the avionics group under the Pavo Group in 2008. In 2019, Pavelsis was established as a spin-off company with the principle of full compliance with aviation and the standards it brings. Our most important competencies are embedded designs (microprocessor, arm-based processors, FPGA), power equipment and systems, communication and control units and systems of aircraft.

With an approach that prioritizes quality, **PAVELSİS**, with its product range of over 35 products and many R&D projects, goes beyond technology transfer in avionics devices and produces sectoral solutions and offers economical and low-risk solutions to its business partners worldwide.

PAVELSİS acts with the vision of a company that offers customer-oriented and agile methodologies in design and production using global standards in the Defense and Aerospace sectors. As a reflection of these capabilities and experiences, we are one of the largest solution providers and design partners of aerospace and defense industry companies such as Turkish Aerospace Industry, ROKETSAN, HAVELSAN.

Kalite ve Tasarım Yaklaşımımız

Our documents/certificates for the design/production of our projects and products in accordance with quality standards and models:

- ☐ **ISO 9001:2015**
- ☐ **ISO 14001:2015**
- ☐ **ISO 45001:2018**
- ☐ **AS9100**

Avionics and military standards:

- ☐ **MIL-STD-461F**
- ☐ **MIL-STD-704F**
- ☐ **MIL-STD-810G**
- ☐ **RTCA/DO-254 (Up to DAL B)**
- ☐ **RTCA/DO-160G**
- ☐ **RTCA/DO-178**
- ☐ **ARP-4761**
- ☐ **ARP-4754**
